Business Offer:

Amvic SRL (member of the Amvic Group) developed in Romania the Amvic construction system, after obtaining the production licence from Amvic Canada in 2005.

Insulated Concrete Forms (ICFs) are formworks for concrete that stay in place as permanent building insulation for energy-efficient, cast-in-place, reinforced concrete walls.

Since their introduction to Romania, Amvic Insulated Concrete Forms (ICFs) have set the standard for quality, performance, and value.

There are more than 1500 Amvic buildings (blocks of flats, kindergartens, schools, churches, city halls, dispensaries, office buildings) among which about 70 are Passive Buildings, not only in Romania, but also in Switzerland, Norway, Bulgaria, Finland, Greece, France, Austria and Slovakia.

An Amvic ICF construction combines design flexibility and construction versatility.

Our clients get high quality products and valuable support.

The product we promote is green, cost effective and easy to install, offering a construction raised:

- * Faster
- * Stronger
- * Better insulated
- * More economical

Amvic SRL has implemented and maintains the Integrated management System for Quality, Environment and Health, conforming to SR EN ISO 9001/2008, SR EN ISO 14001/2005, and SR OHSAS 18001/2008.

PATEC Ltd. was initially set-up to meet the growing demand for a specialized company in ship automation engineering & commissioning, generated by the expanding works in the Asian area. PATEC is the solution for ship electric installations and automation: alarm & monitoring system, power management system, cargo control and tank measurement level system and bridge manoeuvring system.

Activities on running are: Sales- it is an activity in a continuous dynamic. We have capacity to provide a wide range of components and equipments used in ship mechanical and electrical installations as well as various electrical switchboards and panels. Engineering- we can provide designs in AutoCAD and we use specific application for ship electrical installations and shore automation systems. Commissioning is starting with expertise on board, installing, continuing with maintenance and repairs, shore tests and sea trials. Power Management of vessel - actually we are able to provide and to deliver a complete power management solution on board, for new vessels or retrofit types.

In our activity we are familiar with specifications and regulations of Bureau Veritas Register, Germanischer Lloyd Register, Lloyd's Register and CCS Classification Societies.

We have a traditional cooperation of more than 10 years with: Praxis Automation Technology BV – The Netherlands, SIEMENS AG Norway and China. A very good cooperation is built with: JIMCO Korea, Terasaki Electric CO Singapore and Elcome International AE. A new cooperation with great prospects has started in 2009 with our new partners: NORDIC FLOW CONTROL Ltd. Singapore and China and PANASIA Korea.

Business Area: Asia (South Korea, Emirates, China, India and Singapore) and Europe (The Netherlands, Greece, Germany, Romania, Russia).

Best Praxis is our name, but not our limit!

As one of the major domestic markets of south-eastern Europe, Romania continues to attract the attention of international businesses. Low production cost and high productivity ensure that Romania is of increasing importance for European growth strategies of many international businesses.

Rödl & Partner has been present in Romania for 10 years and possesses a unique track record of helping foreign investors, drawing on the expertise of professionals in our Bucharest office. Our team combines local in-depth knowledge with the understanding of an overseas investor. We offer a broad spectrum of assurance and advisory services for a wide range of clients. Our focus in Romania lies in auditing, outsourcing, pay-roll, tax consulting services, legal advisory and on foreign direct investment in the industrial and property sectors.

Representative*Business Offer:*

The development of the Romanian economy, in connection with quality awareness and safety, has determined the management of TUV AUSTRIA GROUP to contribute actively to it by carrying out several services in Romania.

TÜV AUSTRIA ROMANIA SRL was founded in November 2006 with a small office in Otopeni. Since beginning of 2008 the company is running branch offices in several cities around Romania: Bucharest, Craiova, Pitesti, Ploesti and Timisoara and it is still not limited to.

The philosophy that runs through all the activities of TÜV AUSTRIA ROMANIA is the assurance of the quality and the safety of products and services of its clients. The added value for all such products and services, which is derived from the cooperation within the TÜV AUSTRIA GROUP, is always at the centre of all the acts of the organisation.

Through a large number of Accreditations, Notifications, Authorisations and Certifications, TÜV AUSTRIA ROMANIA provides undisputed evidence of its competence, its independence and its dedication to a high quality of services provided.

The certificates are issued carrying the TÜV CERT logo - through the participation of TÜV AUSTRIA CERT GmbH-, providing worldwide recognition and value.

TÜV AUSTRIA ROMANIA, with subsidiaries in Romania, has extended its wide range of services. The diversity of services offered, along with the possibility to offer complete packages tailored to our customers' requirements, makes us stand out from other such Bodies.

TÜV AUSTRIA ROMANIA is an independent inspection body with highly educated and qualified staff members. The cooperation within the TÜV AUSTRIA GROUP gives access to top equipped laboratories. TÜV AUSTRIA ROMANIA is a 100% daughter company of TÜV AUSTRIA HOLDING AG.

Viada articles - expression of femininity

The articles of Viada, business or casual outfits combine the latest fashion trends with the classic, but always smart cuts. The Viada team has managed, during its 15 years of existence, to create, manufacture and sell high quality collections designed for modern, business, refined, but most of all, feminine women.

Viada has understood the modern women's needs and it has successfully re-defined the classic style of business suits by adding a smart touch to them. At the same time, Viada creates trousers, shirts, skirts, and jackets so that the modern woman may define her own original style, preserving the preoccupation for details and cut precision.
